VERSION INFORMATION

Drobo Firmware: Version 2.1.1 [7.20.45080]

KEY HIGHLIGHTS

This is a new release of Drobo Firmware. This version of Drobo Firmware is compatible with Drobo model B800fs.

- Fixed Time Machine backup failures caused by intermittent stalls.
- Fixed performance issues with Time Machine backups.
- Fixed issue that caused files to no longer be visible when an AppleDB database corruption occurred.
- Fixed issue that caused files (stored on a share created from a Windows system) to not be visible when connected from a Mac.
- Fixed Drobo Dashboard discovery issue caused by an internal Drobo FS crash.
- Fixed performance issue when deleting files.
- Fixed issue that caused corrupted swap files to prevent volumes from being mounted.
- Fixed issue that caused files stored on the Drobo FS to have incorrect time.
- Fixed issue that caused the device name not to be included in email alerts sent by the Drobo FS.
- Fixed issue that caused Drobo Sync to fail when source and target are on same subnet and bonding is enabled.

BEST PRACTICES

In accordance with industry best practices, you should always backup your data before any firmware upgrade. For more information, please visit www.drobo.com/support.
